PROFILE	Highly proficient software engineer with several years experience building products as an individual contributor, architect, mentor, and team lead.	
EXPERIENCE	<b>NewsCred</b> <i>Architect/Lead Software Engineer</i>	2013 - 2016
	<ul style="list-style-type: none"><li>– Lead development of NewsCred's SAAS product from inception using Node, AngularJS, and MongoDB.</li><li>– Lead team of four developers to deliver V1 of NewsCred in under 6 months, personally contributing over 50% of the project's lines of code.</li><li>– Played central role in growing number of contributors to the Node/Angular codebase to over 30 developers across five different squads in NY and Dhaka.</li><li>– Set patterns around unit-testing. Helped codebase grow from no unit tests to thousands within a few months.</li><li>– Coached engineers on best practices for writing and designing clean, maintainable code. Set patterns in both front-end and back-end codebases, gave internal talks, authored blog posts, and reviewed most pull requests.</li><li>– Worked as first-responder for outages and assisted support team in classification and escalation of other bugs. Set up tools for support engineers and trained them to debug and resolve issues with minimal developer involvement.</li><li>– Bootstrapped a culture of performance in front-end teams by initiating the measurement of metrics and coaching engineers to become performance experts.</li><li>– Lead efforts to migrate codebase from monolithic architecture to service oriented architecture while continuing to build client-facing features.</li><li>– Played key role in product and UX ideation.</li></ul>	
	<b>Bio-Rad Laboratories</b> <i>Software Engineer</i>	2011 - 2013
	<ul style="list-style-type: none"><li>– Designed, architected and implemented a Java/Javascript single-page application to manage all of Bio-Rad's B2B clients, replacing an inefficient and error-prone process involving daily emails with attached spreadsheets.</li><li>– Created and managed a SQL database containing information on all Bio-Rad B2B clients by coordinating with business and technical teams.</li></ul>	
	<b>Bio-Rad Laboratories</b> <i>QA/Automation Engineer Intern</i>	2008-2009
	<b>Pomona College - Information Technology Services</b> <i>Technical Support Student Consultant</i>	2007-2011
	<b>Gabriel Lucas</b> <i>Web Developer Intern</i>	2005
EDUCATION	<b>Pomona College</b> , Claremont, CA <i>BA in Computer Science</i> , 2011	
SKILLS	<b>Technical:</b> Javascript, Angular, Node, Python, MongoDB, HTML/CSS, SQL, Java, Ansible, C, Django... <b>Other:</b> Software Architecture, Testing & TDD, Agile, Client-Centric Development...	
ALSO...	Painter, Pianist, Amateur Cook, Runner, Podcast Addict, Bilingual English & French...
