PROFILE
Highly proficient software engineer with several years experience building products as an individual contributor, architect, mentor, and team lead.

EXPERIENCE

NewsCred, New York, NY   2013 - 2016
Architect/Lead Software Engineer
 — Led development of NewsCred's SAAS product (> $2 million MRR) from inception using Node, AngularJS, and MongoDB. Took on responsibilities as an architect, team lead, technical product manager, and mentor while continuing to be one of the top individual code contributors in the company.
 — Led a team of six developers to deliver V1 of NewsCred in under six months, personally contributing over 50% of the project's lines of code.
 — Played a central role in growing the number of contributors to the Node/Angular codebase to over 48 developers across five different squads in NY and Bangladesh.
 — Architected and built key components of the application including the domain model, REST API, social publishing infrastructure, SSO authentication, permissions/roles, modular front-end structure, and more...
 — Coached engineers on best practices for writing maintainable code. Set patterns in front and back-end codebases. Gave internal talks and mentored engineers one-on-one.
 — Worked as first-responder for outages and assisted support team in classification and escalation of other bugs. Set up tools for support engineers and trained them to debug and resolve issues with minimal developer involvement.
 — Bootstrapped a culture of performance by initiating the measurement of metrics and coaching engineers to become performance experts.
 — Led efforts to migrate codebase from monolithic architecture to service oriented architecture while continuing to build client-facing features.
 — Played key role in product and UX ideation.

Bio-Rad Laboratories, Hercules, CA   2011 - 2013
Software Engineer
 — Designed, architected and implemented a Java/Javascript single-page application to manage all of Bio-Rad's B2B clients.
 — Created and managed a SQL database containing information on all Bio-Rad B2B clients by coordinating with business and technical teams.

Bio-Rad Laboratories, Hercules, CA   2008-2009
QA/Automation Engineer Intern

Pomona College - Information Technology Services, Claremont, CA   2007-2011
Technical Support Student Consultant

Gabriel Lucas, San Francisco, CA   2005
Web Developer Intern

SKILLS
Technologies: Javascript, Angular, Node, Python, MongoDB, AWS, Ansible, HTML/CSS, SQL, Java, Ansible, C, Django...
Other: Software Architecture, Automated Testing & TDD, Service Oriented Architecture, Continuous Deployment, Monitoring, Agile, Client-Centric Development...

EDUCATION
Pomona College, Claremont, CA
BA in Computer Science, 2011
